CYBERASSIST™

Platform-as-a-Service for centralized Cybersecurity Program and Compliance Management

CyberAssist™ is a centralized and easy to use Cybersecurity and Compliance Management platform-as-a-service designed to simplify the creation and management of cybersecurity programs and compliance initiatives. CyberAssist provides a centralized framework that includes all you need to get your initiatives up and running quickly, easily and securely.

CyberAssist™ reduces cost, complexity and time to HIPAA compliance by 80%.

HIPAA compliance is costly in terms of the time and resources it takes to achieve, maintain and respond to audits and even more costly when an organization is found to be non-compliant. The CyberAssist™ platform reduces your time to compliance by providing you with all you need to get up and running quickly, in a secure, repeatable and defensible manner.

HOW DOES CYBERASSIST™ HELP WITH HIPAA COMPLIANCE?

Policies and Procedures
Provides a templatized set of HIPAA policies and procedures that can be easily customized to your organization.

Compliance Assessments & Tasks
Realize instant value with customized compliance templates and workflows to get you started on the road to HIPAA compliance quickly.

Cybersecurity & Compliance Services On-Demand
Gain peace of mind knowing that a team of compliance and cybersecurity experts are there when you need them to help with; consulting, breach response & remediation, penetration testing, risk assessments, remote monitoring and SIEM solutions.

Breach Response
Minimizes cost and impact of breaches with the ability to submit, remediate, respond & report security breaches to the HHS quickly and easily from anywhere, anytime.

3rd Party Supplier Management
Provides 3rd party supplier management to ensure regulatory compliance.

Training
Includes a robust training module that allows you to train and test your employees on your HIPAA policies and procedures, ensure adoption and demonstrate reasonable efforts in the case of an audit.

Auditability
Complete audit trail of all compliance activities to deliver real-time access and visibility into your compliance efforts and breach responses making regulatory requests easy.

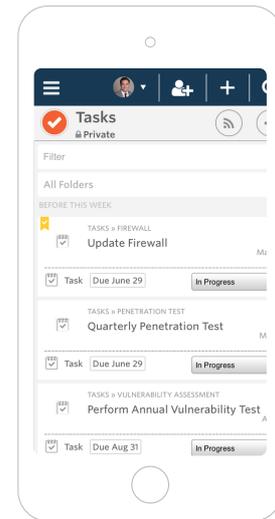

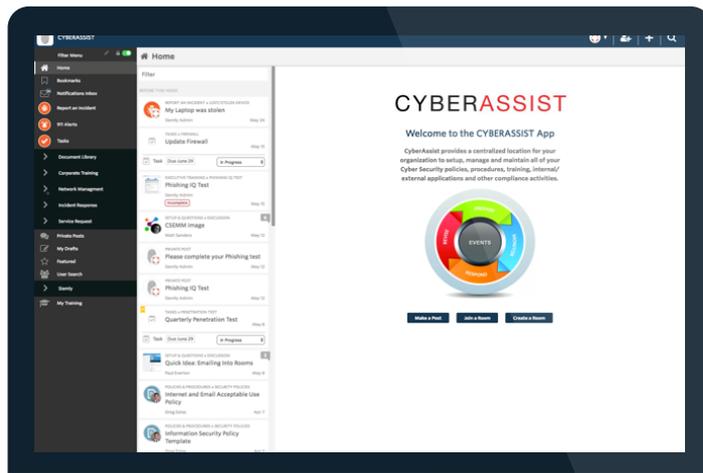

HIPAA COMPLIANCE COSTS: BETWEEN $10K - $100K ANNUALLY

AVERAGE COST PER PHI BREACH: $3.7M

NUMBER OF HOSPITALS BREACHED SINCE 2015: OVER 85 PERCENT

FINES ISSUED IN 2016 FOR HIPAA VIOLATIONS : OVER $23M

Reduce Risk, Cost and Incident Response Time

Cyber-security is complex. Multiple functional units, external resources and systems are almost always involved. Using Cyber**Assist**™ as your single unified cyber-security and compliance management platform makes it easier and more efficient for relevant stakeholders to be automatically notified of an event, manage breaches, communicate securely and assess impact – thereby quickly mitigating further potential damage. Risk is further mitigated because corporate response teams can quickly take action and oversee the response and reporting of breaches to law enforcement and regulatory authorities.

Demonstrate Defensible Security and Compliance

Cyber**Assist**™organizes and tracks every step of the process and stores all the information in a centralized secure repository and facilitates seamless response to regulatory compliance audits or investigations. With CyberAssist™ you can easily prove that reasonable efforts have been taken to prevent breaches by showing when and what policies and procedures were published, how you took steps to train your employees and how you adopted an incident response plan by implementing the platform..

Protect Sensitive Communications from Hackers

Communication regarding breach response needs to be protected. The Cyber**Assist**™ platform delivers a secure off-band communication method for all parties involved, grants role-based access to all pertinent data and allows teams to work together and communicate effectively. Cyber**Assist**™ provides peace of mind that all cyber event communications from within the platform are secure and may be protected by attorney-client privilege.

Get started today! Configurable solutions and tiered pricing are available to fit every situation.

Blue**Star** has been providing services in the legal industry for the past 15 years. We provide comprehensive data discovery, consulting and cyber security solutions to law firms, government entities and corporations worldwide.
